It is a web application for real estate projects.
Technologies used: Asp.net MVC (razor) - MSSQL - IIS - VS2013

Khair Organization project   **Sep 2015 - Feb 2016**

t is a web application for an orphan organization.
The project took five months, and the tools used were:
Asp.net MVC (razor) - MSSQL - IIS - VS2013

Orphans Project   **Feb 2015 - Feb 2016**

It is a web application for orphans organization. Duration of

this project were one year.
Technologies used: Asp.net MVC (razor) - MSSQL - IIS – VS2015 - DocumentFormat.OpenXml

Iris Recognition   Sep 2011 - Sep 2012

It is the process of automatic identifying on the identity of persons through the information and features of the physical that are unique in an iris of the eye.It is achieved using the techniques of computer vision and image processing. The user enters the eye image belonging to a person and that have been taken already by a special camera to the application (program), which processes the image according to certain stages to extract iris patterns and features (information) from the image and compare it with the corresponding in the images that are processed and stored in database and then take the decision whether or not there is a match to know the identity of this person if there is a match. Duration of this my graduation project were nine months, used tools were (C# - Matlab - OpenCV(EMGU in C#) - SQL server), delivery date was at 20/05/2012 and my grade was 88%.

Student grades automation   Jan 2011 - Jun 2012
program - exam automation

A program to automate the grades of undergraduate students at the University of Aleppo.
It is a site where students can inquire about their grades easily and quickly.
Tools used: (Microsoft SQL Server - C# - Asp.net),
Submission was in June 2012 and I obtained a grade of 75%.

Library website   Jan 2011 - Jan 2012

Books website for book sales, printing, distribution and publishing.
Technologies used: (PHP - MySQL - XAMPP).

Transportation website   Jan 2011 - Jan 2012

It is the website that gives services and facilities for helping in journeys affairs and moving everywhere over the world. Tools were (PHP - MySQL - XAMPP).

AUC Compiler at Aleppo University   Jan 2010 - Jan 2011

It is a compiler built using the C# language. What we do can compile the specific language and is made according to excellent techniques.
Technologies used: (Visual Studio 2010 - C# Programming language).
The delivery date is January 2011 and my grade is 78%.
